

Ali Sample

Software Engineer — DevOps & AI Systems

Summary

Software engineer with 8 years of experience in DevOps, infrastructure automation, and CI/CD pipelines, currently transitioning into AI engineering with a focus on retrieval-augmented generation systems and production LLM deployment.

Experience

Senior DevOps Engineer — TechCorp Inc. (2020–2026)

Led migration of CI/CD pipeline to Kubernetes, reducing deployment time by 60%. Built observability stack using Prometheus and Grafana for 40+ microservices.

DevOps Engineer — CloudWorks (2017–2020)

Automated infrastructure provisioning with Terraform across AWS and GCP. Reduced incident response time by 45% through improved alerting.

Education

B.Sc. in Computer Engineering — Sharif University of Technology (2013–2017)

Skills

Python, Bash, Terraform, Kubernetes, Docker, AWS, Prometheus, Grafana, CI/CD, RAG systems, MCP, LLM evaluation
